After about 1.5-2 hours driving with reindeer sled we return to Reindeer Lodge where you help to unharness your draft reindeer and release it to the reindeer enclosure. Ráidu - Encounter the reindeer

Travel in a snowmobile-drawn sled from Jukkasjärvi out to the reindeer camp in the forest. We keep and fodder part of our reindeer herd during winter to help them survive hard grazing conditions due to climate change. There are adult reindeer, youngsters and from around mid-December also calves that will eat out of hand. The reindeer is one of the Sámi society's most important culture bearers and resources.

We will enter the reindeer enclosures and feed them. Our reindeer will curiously come, sniff at you and most likely venture eating out of your hand. You will hear a lot about how today's reindeer husbandry works, what the challenges are, and what it means to decide for a traditional profession that is dear to one's heart.

The reindeer herder will show you the art of lassoing before it is your turn to throw the lasso. When some of the reindeer stags are caught you will assist leading them to the sled track where the reindeer will be harnessed. We still tame and train some of our reindeer to conserve the cultural Sámi heritage of reindeer sledding.

And we are proud to offer you the chance of driving reindeer with a sled around a short circuit if you like. You can compete with other drivers or if you prefer, just have a peaceful and quiet reindeer drive.

After the reindeer sledding part you will be invited into a lávvu, i.e. Sámi tent, where you will sit on reindeer skins around a sparkling warming fire whilst learning more about the indigenous people of Fennoscandia, i.e. the Sámi people’s culture, history and our way of life. You will be served suovas, the Sámi signature dish, which is lightly-salted and cold-smoked sliced reindeer meat, fried over the open flames and served on gáhkku-bread with a dash of lingonberry jam. It is eaten like a wrap and tastes best with hot, steeped coffee sipped from a guksi, a drinking cup carved from birch burl.

On the way back to Jukkasjärvi we make a halt at our handicraft shop at Márkanbáiki where you can have a look at a range of traditional and modern local Sámi arts and crafts.

The trip takes you over lakes and through the old forest to finally arrive at a winter white landscape surrounded by sinewy mountain birch. We arrive at the tipi to enjoy a coffee break and the sparkling winter landscape around us. Out here, it is rich with wildlife, so we have a fantastic chance to see and take pictures of wild animals. We teach you how to make a fire and boil coffee over the open fire. We also serve you a sami-inspired berry drink along with sausages made from moose, reindeer and bear meat. Northern light dinner with SkyArk

Would you like to combine a magnificent nature experience with comfort, quality and relaxation? Then you should join us on a tour with SkyArk where you will experience our region’s wilderness from its best side! We meet at Camp Ripan where you settle down in one of the snowmobile ark’s bean bags. As we travel along the frozen river and through the snowy forests you can enjoy the panoramic view comfortably protected from wind and cold. The Sami tipi, lávvu, is waiting for us at our destination. There are no lights to spoil our view of the sky, so we have a fantastic chance to see the mythical evening dance of the northern lights. In the lávvu you will experience a part of the Sami food culture when served njalla (Sami bread), smoked reindeer and moose with a potato salad topped with lingonberries around an open fire. Your dinner beverage is “Tears from Lapland”, made from lingonberries or blueberries, and poured in your kása (wooden cup). Dinner is rounded off with a local dessert and fresh brewed coffee. Listen close to the crunch of the snow, the swish of the northern lights and tales from the region streamed through the speakers in the ark. During the tour, we will stop to take photographs, which we will send to you as a memory of your trip.
